### WHAT IS THE PRODUCT?

#### Type:

Mutual Investment Fund under Luxembourg Law governed by Part I of the Law of December 17, 2010.

#### Term:

This sub-fund is not subject to any fixed term. The Fund is established for an unlimited duration; it may be dissolved at any time with the mutual approval of the Management Company and the Depositary Bank. The Fund shall be liquidated in the cases provided for in Article 22 of the Law of December 17, 2010. The Management Company may decide to enter into liquidation the Sub-Fund in case of extraordinary events such as changes in the political, economical or monetary situation or when the net asset of the Sub-Fund is less than a minimum level for the Sub-Fund to be operated in an economically efficient manner, as further described in the Prospectus.

#### Objectives:

The Sub-Fund, expressed in Euro, aims to provide consistent absolute returns through investing indirectly in numerous absolute return strategies primarily composed of listed equities and related instruments (the "Exposed Strategy"). The Sub-Fund seeks to maintain the value of the capital through the use of various investment strategies techniques. The Exposed Strategy is composed of listed equities (including eligible ETFs up to 10% of the net asset value, and other equity related securities), derivatives involving OTC, options, forwards and futures. The Exposed Strategy may be invested up to 20% of the net asset value in China-A shares via Shanghai-Hong Kong Stock Connect. The Sub-Fund will gain indirect exposure by investing mainly in unfunded TRSs with the Underlying Portfolio(s) as underlying. The Sub-Fund may use a Portfolio Swap and also a Financing Swap whereby the Sub-Fund will purchase Financing Assets and transfer full economic interest in such assets to first class financial institutions acting as swap counterparty pursuant to swap agreements. The Financing Assets will be equity instruments (including ADR and GDR), and will have no more than 30% exposure to emerging markets. Each Underlying Portfolio will comply with the investment policy of the Sub-Fund and more particularly with the Exposed Strategy and will be managed by the Investment Manager. The Sub-Fund may be entirely invested in TRSs. Direct investments, for cash purpose, may include debt securities issued by governments, corporations, or institutions, low risk, money market instruments and deposits with credit institutions.

The Sub-Fund may invest its net assets:

- Up to 10% in units of other UCITS or other UCIs
- Up to 30% in non-investment grade debt securities

Although the investment objective of the Sub-Fund is to provide investors with consistent absolute returns by implementing a set of market neutral investment strategies, the net market exposure of the Sub-Fund may temporarily vary according to the Investment Manager's view of market prospects and the Underlying Portfolio may be net short of markets or net long of markets. However the overall net market exposure of the Underlying Portfolio generally does not exceed a range from 50% net short to 50% net long. The Underlying Portfolio takes long and short positions over a variety of time periods, however the combination of long and short positions may never results in uncovered short positions.

The Sub-fund is actively managed. This Sub-Fund is not managed in reference to a benchmark.

This is a capitalization Unit-Class which reinvests all income generated by the Sub-Fund.

You may request to redeem the units held at any moment, in accordance with the Prospectus.

#### Intended Retail Investor:

The Sub-fund is suitable for investors who look for long term investments. The investor must be able to accept a certain volatility and the possibility of losing a part of the invested amount. This product is for investors who meet the conditions for accessing the product in question (see prospectus) with any level of knowledge and experience. Investors should understand the product risks and only invest if they can bear potentially substantial losses.

## WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

### Risk indicator

The risk indicator assumes you keep the product for a minimum of 5 years.

The actual risk can vary significantly if you cash in at an early stage and you may get back less.

You may not be able to sell your product easily or may have to sell at a price that significantly impacts on how much you get back. The redemption price may, depending on the evolution of the net asset value, be higher or lower than the paid issue price.

Specific reasons, such as change restrictions or circumstances outside the control of the Depositary Bank, may render impossible the transfer of redemption amount in the country where the redemption is requested.

In case of mass redemptions, the Management Company may decide to suspend the redemptions until it has sold the necessary assets.

The summary risk indicator ("SRI") is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as class 4 out of 7, which is a medium risk class.

This rates the potential losses from future performance at a **medium** level, and poor market conditions could impact the capacity of the fund to pay you.

**Other risks materially relevant not included in the SRI:** Counterparty Risk, Credit Risk, Derivatives Risk, China Risk, Operational risk, This product does not include any protection from future market performance. Please refer to the 'Risk' section of the prospectus for more details.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the fund completed where applicable by that of its reference framework over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

This type of scenario occurred for an investment between 2015 - 2025.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

## WHAT HAPPENS IF FIDEURAM ASSET MANAGEMENT (IRELAND) DAC IS UNABLE TO PAY OUT?

There is no compensation or guarantees for investors in the event of the insolvency of the Management company. It is specified that each mutual investment fund constitutes an autonomous and separate asset in all respects from the assets of the Management company and from that of each investor as well as from any other assets managed by the same Management company. Furthermore, the Management company is liable exclusively for the obligations contracted on behalf of the sub-fund with the assets of the same fund. On those assets actions by creditors of the Management company or creditors of the depositary or sub-depositary are not permitted. The creditors of individual investors are permitted to take action only on the units/shares held by the individual investors. The Management company may in no case use, in its own interest or in the interest of third parties, the assets belonging to the managed funds.

## WHAT ARE THE COSTS?

The person selling or advising this product may charge other costs, in which case this person will provide you with information about these costs, and should show you the impact that all costs will have on your investment over time.

### Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods:

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- EUR 10 000 is invested.

| Investment: 10 000 EUR | If you exit after 1 year | If you exit after 5 years |
|------------------------|--------------------------|---------------------------|
| <b>Total Costs</b>     | 530 EUR                  | 981 EUR                   |
| Annual Cost Impact*    | 5.3%                     | 2.1%                      |

\*This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be -0.2% before costs and -2.3% after costs.

### Composition of Costs

| One-off costs upon entry or exit                                   |   | If you exit after 1 year |
|--|---|--------------------------|
| <b>Entry costs</b>   | 3.81% of the amount you pay in when entering this investment (including fixed fees)   | 381 EUR                  |
| <b>Exit costs</b>  | 0.05% of your investment before it is paid out to you (including fixed fees)  | 5 EUR                    |
| <b>Ongoing costs</b>   |   |                          |
| <b>Management fees and other administrative or operating costs</b> | 1.26% of the value of your investment per year. This amount is based on costs incurred for the custody, the administration and the management of the product.   | 141 EUR                  |
| <b>Portfolio transaction costs</b>                                 | 0.03% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell. | 3 EUR                    |
| <b>Incidental costs taken under specific conditions</b>            |   |                          |
| <b>Performance Fee</b>   | There is no performance fee for this product.   | N/A                      |

## HOW LONG SHOULD I HOLD IT AND CAN I TAKE MY MONEY OUT EARLY?

**Recommended minimum holding period: 5 years**

The above mentioned period has been defined in accordance to the product characteristics. It is determined on the basis of the sub-fund's risk and reward profile. Your ideal holding period may be different from this minimum recommended holding period. If the holding period is shorter than the recommended minimum, this may have a negative impact on the sub-fund's risk and reward profile. We recommend that you discuss this with your advisor. You may request to redeem the units held at any moment, and on any business day, in accordance with the Prospectus. Any costs are shown under "Composition of costs" above.

## HOW CAN I COMPLAIN?

Any complaints must be sent by the investor to Fideuram Asset Management (Ireland) DAC in writing and according to one of the following methods indicated: registered letter with return receipt; e-mail to the address: [info@fideuramireland.com](mailto:info@fideuramireland.com). Complaints are considered validly received by the Management Company if they contain at least the following information: identification details of the person submitting the complaint; reasons for the complaint, details of the economic damage; sign-off or other element allowing for the identification of the investor. Complaints can also be sent by the investor to the authorized Distributors in the countries where the units of the sub-fund are distributed.
