WHAT IS THE PRODUCT?

Type: Mutual Investment Fund under Luxembourg Law governed by Part I of the Law of December 17, 2010.

Term: This sub-fund is not subject to any fixed term. The Fund is established for an unlimited duration; it may be dissolved at any time with the mutual approval of the Management Company and the Depositary Bank. The Fund shall be liquidated in the cases provided for in Article 22 of the Law of December 17, 2010. The Management Company may decide to enter into liquidation the Sub-Fund in case of extraordinary events such as changes in the political, economical or monetary situation or when the net asset of the Sub-Fund is less than a minimum level for the Sub-Fund to be operated in an economically efficient manner, as further described in the Prospectus.

Objectives: The Sub-fund has been categorised as an ESG Promotion Strategy Sub-fund in accordance with article 8 "SFDR". The Sub-fund, expressed in EURO, aims to outperform the benchmark with an investment process based on a binding environmental, social and governance ("ESG") and sustainability factors analysis for the selection of the instruments.

The sub-fund invests in:

- a) Primarily in Green, Social, Sustainability and Thematic Bonds according to the International Capital Market Association's ("ICMA") bond labelling methodology that includes three categories: Green Bonds, Social Bonds and Sustainability Bonds.
- b) Residually in Government bonds and bonds issued by governmental, public, supranational entities with an investment grade rating and bonds issued by other corporate entities.
- c) In Shares/Units of funds and Exchange Traded Funds (ETF) up to 10% of its net assets.

The sub-fund will not invest in distressed securities nor in default securities.
 The sub-fund could be exposed to unhedged currencies different from Euro.
 The Sub-Fund may use financial derivative instruments for the purpose of risk hedging and investment.

The sub-fund is actively managed. The sub-fund is managed in reference to a benchmark which consists of the index "Bloomberg MSCI Euro Corporate Green Bond 5% Capped Index" Total Return Index, Value Unhedged, converted in EUR, which is used for portfolio construction, risk and performance measurement. The degree of freedom allowed within the management of the sub-fund is significant. The relative risk and positioning to the benchmark is monitored. To provide a disciplined management approach, risk limits are set to contain investment risk. It is expected that, in normal circumstances, a significant part of the investments of the sub-fund will be components of the benchmark, however there is discretion to invest in other securities not included in the benchmark. This is a capitalization Unit-Class which reinvests all income generated by the Sub-Fund. You may request to redeem the units held at any moment, in accordance with the Prospectus.
