1. GENERAL INFORMATION

INTERFUND SICAV (the "Fund") was established on August 28, 1968, in the Grand Duchy of Luxembourg under Luxembourg Law in the form of a SICAF ("Société d'Investissement à Capital Fixe") and was transformed into a SICAV (Société d'Investissement à Capital Variable) on December 13, 1996. The fund is governed by Part I of the Luxembourg Law of December 17, 2010 relating to undertakings for collective investment (the "Law").

Following the EGM dated March, 28th 2017, the financial year-end was changed from December 31 to August 31, effective January 2017.

As of February 28, 2018, the number of active sub-funds in the Fund (the "Sub-fund(s)") is twenty four each one having a specific investment policy.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The financial statements have been prepared using accounting principles generally accepted for such investment companies in Luxembourg, which include the following significant accounting policies:

a) Foreign currency conversion

Assets and liabilities denominated in currencies other than EURO are converted at the closing spot rate of the net asset value date. Foreign currency trades are converted at the closing spot rate of the transaction date and then revaluated daily at the closing spot rate of the NAV date. Income and expenses expressed in currencies other than the accounting currency of the Sub-fund are converted into the latter at the closing spot rate of the transaction date. Realized and unrealized foreign currency gains or losses are included in the result of operations of the period.

b) Valuation of investments

Listed securities as well as securities traded on other organized markets are valued at the latest available market prices as of the net asset value date. Other securities are valued at their estimated market prices according to the Pricing Policy established by the Board of Directors of the Fund.

Units/shares of Undertakings for Collective Investment, either listed or not, are valued on the basis of their last available net asset value.

c) Income recognition

Interest income is recorded on an accrual basis and dividend income is recorded on a dividend ex-date basis, net of withholding tax if any.

d) Carrying value of securities

The carrying value of securities is determined on a weighted average cost basis. It includes purchase price, brokers' fees and taxes.

e) Transaction costs

The Sub-funds incur transaction costs which are included in the caption "Sub-custodian fees" of the Statement of Operations and Changes in Net Assets.

f) Allocation of expenses

All the expenses directly and exclusively attributable to a certain Sub-fund are borne by that Sub-fund. If it cannot be established that the expenses are directly and exclusively attributable to a certain Sub-fund, they will be borne proportionally by each Sub-fund.

g) Set-up costs

The expenses originated during the establishment of the Fund have been fully amortized.

Where further sub-funds are created, these sub-funds bear their own set-up costs. The set-up costs for new sub-funds created may, at the discretion of the Board of Directors of the Fund, be amortized on a straight line basis over 5 years from the date on which the sub-funds started activity. The Board of Directors of the Fund may, in its absolute discretion, shorten the period over which such costs are amortized.

h) Forward foreign exchange contracts

Forward foreign exchange contracts are valued at the market forward rates for the remaining period from valuation date to maturity date.

The counterparties for each Sub-fund for the forward foreign exchange contracts as at February 28, 2018 were as follows:

j) Swap contracts

Swap contracts are valued on the basis of their fair value, according to the Pricing Policy established by the Board of Directors of the Fund. The Fund may also enter into Interest Rate Swaps and Credit Default Swaps.

k) Option contracts

Options listed as well as options traded on other organized markets, are valued at the latest available market prices as of the net asset value date.

Not listed options are valued at their estimated market prices as determined according to the Pricing Policy established by the Board of Directors of the Fund.

Notably, Asset Swapped Convertible Option Transactions ("ASCOT") are valued using a formula which subtracts the bond floor from the underlying convertible bond market price in order to get an estimation of the recall floor (or strike of the option). If the bond floor is higher than the underlying convertible bond market price, the ASCOT will be considered as valueless.

l) To be announced contracts

To-Be-Announced contracts ("TBA") are forward agreements on Mortgage-backed securities ("MBS") baskets included in the "Investments in marketable securities" caption in the Statement of Net Assets. The term TBA is derived from the fact that the actual MBS that shall be delivered to fulfil a TBA trade is not designated at the time the trade is made. The securities shall "be announced" 48 hours prior to the settlement date. TBA trade settlements are often scheduled significantly into the future, but valuation and accounting methodologies applied are not different from transferable securities ones.

The Fund's Combined Statements are the sum of the Statements of each Sub-fund as at February 28, 2018.

8. TAXES

According to Luxembourg law, the Fund is not subject to any income tax but is liable to a subscription tax ("Taxe d'Abonnement") at an annual rate of 0.05% of its total net assets, payable quarterly and assessed on the last day of each quarter. For the sub-fund Interfund Euro Liquidity, qualifying as Money Market Fund, the subscription tax is reduced to 0.01% per year.

Value of assets represented by units/shares in other Luxembourgish undertakings for collective investment ("UCI") is exempted from the Taxe d'Abonnement provided that such units/shares have already been subject to the tax.

Until June 30, 2011, Italian fiscal Law taxed the Fund on the annual result from operations, proportionally attributed to the shares distributed in Italy, at a rate of 12.5%. In case of a negative annual result from operations, this fiscal Law allowed the recording of an Italian tax credit that corresponded to 12.5% of that result.

Since January 1st, 2004, amounts representing Italian tax credit and debit, as described above, have been reallocated among the different Sub-funds in order to keep the tax credit level on Total Net Assets, i.e. the amount unavailable for investments, balanced among Sub-funds. As compensation, interest amounts have been recognized and settled between Sub-funds on the basis of the balance payable or receivable at the end of each month and are recorded in the caption "Interest on others" in the Statement of Operations and Changes in Net Assets.

Any differences in the balance of payable or receivable are the result of shareholders activity during the last month of the period.

The Reference Strategy will obtain exposure to such asset classes in the following manner:

- a. Direct investment in equities and equity related securities which are issued by corporate issuers, which are listed or traded on the markets referred to in Appendix II of the prospectus of the Master Fund;
- b. Total return swaps, futures, options and forwards currency exchange contracts which reference equities set out in (a) or eligible indices which are composed of equity investments set out in (a) above.

In addition to direct investment in securities, the Master Fund is expected to enter into financial derivative instruments ("FDI") transactions to gain exposure to the securities referred above. The Master Fund may take long or short positions synthetically through the use of FDIs. The Master Fund will not take physical short positions. All short positions will be taken through the use of an FDI. The Master Fund may utilise swaps, options, futures and forward currency exchange contracts. The Master Fund may invest in FDI transactions both for investment and efficient portfolio management purposes. FDIs may be exchange traded or over-the-counter.

The Reference Strategy will have no more than 10% exposure to equities and equity related securities of issuers located in emerging markets. The Master Fund will be leveraged through the use of FDI.

INTERFUND SICAV

NOTES TO THE FINANCIAL STATEMENTS AT FEBRUARY 28, 2018 (CONTINUED)

In accordance with the requirements of the Central Bank of Ireland, the absolute VaR of the Master Fund may not exceed 20% of the net asset value of the Master Fund using a one-tailed confidence interval of 99% and a holding period of one month and a historical observation period of 4 years. The ratio of long and short investments may vary through time. The maximum net short exposure of the Master Fund will be -50% and the maximum net long exposure will be 100%. The Master Fund's gross leverage calculated using the sum of the notional exposure of its derivatives positions (including leverage inherent in the Portfolio Strategy) is expected to be between 300% and 350% of the net asset value of the Master Fund and will never exceed 400% of the net asset value of the Master Fund.

The Master Fund may enter into financing swaps and repurchase / reverse repurchase arrangements.

The Master Fund will buy a put option linked to the Portfolio Strategy and net asset value of the Master Fund either separately or as part of the Portfolio Total Return Swap (the "Put Option") from an approved counterparty. The purpose of the Put Option is to offer an element of capital protection equals to 80% of the highest net asset value per Share achieved from the launch of the Master Fund onwards (i.e., commencing with the initial offer price). The Master Fund will pay a premium for the Put Option at normal commercial rates. If the Portfolio Total Return Swap is used for the purpose, it will replicate the economic characteristic of a put option (i.e. the Master Fund may pay an upfront amount equivalent to a put option's premium at inception and will receive the payoff of an amount equals to the Minimum Target Payoff less the value of Portfolio Strategy (if positive)). The Master Fund and the portfolio will only utilise those derivatives that are listed in the Master Fund's risk management process.

SECURITIES FINANCING TRANSACTIONS REGULATION (SFTR) DISCLOSURE

SFTR covers a variety of transactions such as securities lending, repurchase (Repo) or reverse repurchase transactions, buy-sell back or sell-buy back transactions but also Total Return Swaps ("TRS") defined as a derivative contract in which one counterparty transfers the total economic performance, including income from interest and fees, gains and losses from price movements, and credit losses, of a reference obligation to another counterparty.

Securities lending is primarily driven by market demand for specific securities and is used, for instance, to cover short selling or settlement failures. In this type of transaction, the lending counterparty lends securities for a fee against a guarantee in the form of financial instruments or cash given by its clients or counterparties.

Repos/reverse repos are generally motivated by the need to borrow or lend cash in a secure way. This practice consists of selling/buying financial instruments against cash, while agreeing in advance to buy/sell back the financial instruments at a predetermined price on a specific future date.

This disclosure aims to improve the transparency of securities financing transactions (SFTs) and TRS.

Please note that:

- as of February 28, 2018, no reverse repurchase agreement transactions nor buy-sell back or sell-buy back transactions were in place;
- all OTC derivative transactions entered under an ISDA Master agreement are netted together for collateral purposes; therefore, any collateral disclosures provided hereinafter are in respect of all OTC derivative transactions entered into by the sub-funds under an ISDA Master agreement, including total return swaps.

As regards the quality of Collateral, the Fund only accepts very high quality collateral. For more information about acceptable collateral please refer to specific sections of the prospectus including but not limited to the information on liquidity, issuer credit quality, maturity and haircuts.

Collateral must at all times meet with the following criteria:

- a) Liquidity: Collateral must be sufficiently liquid in order that it can be sold quickly at a robust price that is close to its pre-sale valuation.
- b) Valuation: Collateral must be capable of being valued on at least a daily basis and must be marked to market daily.
- c) Issuer credit quality: The Company will ordinarily only accept very high quality collateral.
- d) Correlation – the collateral will be issued by an entity that is independent from the counterparty and is expected not to display a high correlation with the performance of the counterparty.
- e) Collateral diversification (asset concentration) – collateral should be sufficiently diversified in terms of country, markets and issuers. The criterion of sufficient diversification with respect to issuer concentration is considered to be respected if the sub-fund receives from a counterparty of efficient portfolio management and over-the-counter financial derivative transactions a basket of collateral with a maximum exposure to a given issuer of 20% of the sub-fund's net asset value. When a sub-fund is exposed to different counterparties, the different baskets of collateral should be aggregated to calculate the 20% limit of exposure to a single issuer. By way of derogation from this sub-paragraph, a sub-fund may be fully collateralized in different transferable securities and money market instruments issued or guaranteed by an UE Member State, one or more of its local authorities, a third country or a public international body to which one or more UE Member States belong. Such a sub-fund should receive securities from at least six different issues, but securities from any single issue should not account for more than 30% of the sub-fund's net asset value.
- f) Safe-keeping: Collateral must be transferred to the Custodian or its agents.
- g) Enforceable: Collateral must be immediately available to the Company without recourse to the counterparty, in the event of a default of the latter.
- h) Non-Cash collateral:
 - cannot be sold, pledged or re-invested;
 - must be issued by an entity independent of the counterparty; and
 - must be diversified to avoid concentration risk in one issue, sector or country.
