WHAT IS THE PRODUCT?

Type:

Mutual Investment Fund under Luxembourg Law governed by Part I of the Law of December 17, 2010.

Term:

This sub-fund is not subject to any fixed term. The Fund is established for an unlimited duration; it may be dissolved at any time with the mutual approval of the Management Company and the Depositary Bank. The Fund shall be liquidated in the cases provided for in Article 22 of the Law of December 17, 2010. The Management Company may decide to enter into liquidation the Sub-Fund in case of extraordinary events such as changes in the political, economical or monetary situation or when the net asset of the Sub-Fund is less than a minimum level for the Sub-Fund to be operated in an economically efficient manner, as further described in the Prospectus.

Objectives:

The sub-fund, expressed in EURO, aims to provide a combination of capital growth and income to deliver a return that is higher than that of the European stock market.

The sub-fund's approach combines strict value-focused screening with rigorous qualitative analysis to ensure the sub-fund has a consistent and disciplined value bias, without compromising on the robustness of the companies in the portfolio. The main drivers of returns are expected to be the value style and overall stock selection rather than any individual sector or stock.

The sub-fund shall invest its net assets:

- at least 80% in the equity securities and equity related instruments, including depositary receipts (such as ADRs, EDRs and GDR), of companies across any sector and market capitalisation domiciled in, or conducting the major part of their economic activity in Europe;
- up to 10% in instruments issued by entities located in emerging markets;
- up to 20% investments in units / shares of UCITS and / or UCIs, including exchange traded funds ("ETFs").
- without limitation in securities denominated in currencies other than the Reference Currency. The currency exposure of the sub-fund is flexibly managed.

The benchmark of the sub-fund consists of the index "MSCI Europe Net Return Index" Net Total Return in EUR which is used for portfolio construction, risk and performance measurement.

The sub-fund is actively managed and the degree of freedom allowed is significant. The relative risk and positioning to the Benchmark is monitored. To provide a disciplined management approach, risk limits are set to contain investment risk. It is expected that, in normal circumstances, a material part of the investments of the sub-fund will be components of the Benchmark, however there is discretion to invest in other securities not included in the Benchmark.

The sub-fund may engage in transactions in financial derivative instruments which may include but are not limited to equity index futures, equity forwards, and currency forwards principally for hedging as well as for efficient portfolio management purposes.

This is a distribution class: the net incomes of the Sub-Fund will be distributed in accordance with the Prospectus.

You may request to redeem the units held at any moment, in accordance with the Prospectus.

Intended Retail Investor:

The sub-fund is suitable for investors who look for long term investments. The investor must be able to accept a certain volatility and the possibility of losing a part of the invested amount. This product is for investors who meet the conditions for accessing the product in question (see prospectus) with any level of knowledge and experience.
